

A PALETTE OF 28 BRILLIANT COLORS featuring 2 distinct dispensing units and module designs

"Key Tie"

Highly effective for intermediate and finishing stage ligation

- ▶ Highly elastic, moderate ligation forces (30 oz.).
- ▶ New module design features flat cross section for ease of ligation and snug bracket fit.
- ▶ Ten modules per runner allows use of two colors on fully bracketed cases with no remaining modules.

"Ultra Mini"

Highly effective for leveling/aligning initial stage ligation

- ▶ Light, gentle and consistent ligation forces (22 oz.).
- ▶ Highly elastic modules feature flat cross sections.
- ▶ Thin module walls for excellent figure "8" tying.
- ▶ Perfect for brackets with limited tie wing area.

Phoenix
functionally designed ligatures

Medical grade elastomeric material provides greater control over a six to eight week period.

Improved flatter cross section for tighter fit and decreased force decay.

Superior Elastic Recovery Chain

- Consistent, continuous, and gentle force for predictable tooth movement.
- Super-elastic, medical grade material provides superior recovery.
- Thin wall makes under tie wing ligation easy and efficient.
- All *SER* chain is moisture, stain, and odor resistant.
- 15' spool.

continuous, open, and long

(long available in selected colors)

* Force guaranteed within .5 +/- ounce *

PRECISION CUT PURE SURGICAL LATEX INTRA-ORAL ELASTICS

forces in ounces equals 3x passive diameter

Diameter Sizes Light 2.5 oz Medium 3.5 oz Heavy 4.5 oz X-Heavy 6 oz

1/8" 3.2 mm	Red A	Green A Color option	Blue A Color option	Brown A
